Stennicator on
a poultry farm

THE STENNICATOR IS AN ELECTRIC PERISTALTIC PUMP that injects stock solutions at a fixed ratio of 1:128, 1 oz per gallon, directly into the water line of livestock facilities.

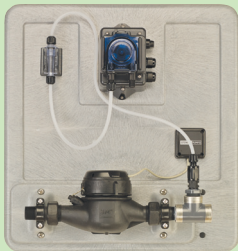

STENNICATOR BENEFITS

- Injects directly into the waterline
- Eliminates bypass valves that restrict water flow
- Activated by an existing dry contact pulsing water meter
- The built-in relay repeats water meter signal to house controller during operation
- Standby setting disables pump while meter signal is still repeated
- Stock solutions do not contact moving parts
- Unaffected by scale or solids that damage parts of water driven medicators
- Tube replacement without tools
